

## Villa Sakti Seminyak

Villa Sakti comprises four buildings including an open sided dining pavilion. The two double-storey buildings and dining pavilion are linked by covered walkways, while the fourth building is a single-storey guest pavilion housing two bedrooms with ensuite open air bathrooms, a library/office with a computer for guest use, and an open living space furnished with a built-in sofa and large antique Javanese coffee table.

Villa Sakti presents four bedrooms located on two levels within the three main buildings, all with en-suite bathrooms and all equipped with full air conditioning, Bose sound systems and iPod docking stations, and flat screen cable-channel TVs with DVD players. Sleeping arrangements are flexible with comfortable accommodation for up to eight adults and two children.

The property is characterized by an abundance of luxurious suarwood and teak from Indonesian Borneo, specially cut marble and tiles from Java and Sulawesi, gorgeous red stone from Lombok Island, and Balinese materials sourced from all over the island. With numerous areas for relaxation, a gorgeous tropical garden, 18-metre infinity pool, and a clever architectural design that blurs the boundaries between tropical open air living and in-door air-conditioned comfort, Villa Sakti truly is a magical private retreat.
